Experience

Cardinal Financial Company | Remote - Manager, Software Engineering

Manager, Software Engineering (Sept 2021 - Present) | Senior Software Engineer (June 2021 - Sept 2021) | Full-Stack Software Engineer (May 2019 - June 2021)

- Scaled and managed a 10-engineer team within a 40+ person organization, more than doubling engineering output through AI-driven operational efficiencies.
- Directed the architecture of core Credit subsystem upgrades, integrating third-party APIs for soft pulls, live debt monitoring, and derogatory credit event tracking, unlocking tens of millions in annual loan volume.
- Slashed Closing Disclosure fee reconciliation time from days to hours, eliminating roughly 90%+ of manual intervention for Closing Coordinators and accelerating loan time-to-close.
- Designed and engineered an improved observability framework through OpenTelemetry, paired with an AI-powered diagnostic engine for automated root-cause analysis.

CommerceHub | Albany, NY - Associate Software Engineer

Dec 2017 - May 2019

- Built and maintained interconnected backend systems for OrderStream, the company's flagship dropshipping / order fulfillment service.
- Provided rotating, 24/7 on-call support for OrderStream's backend systems, resolving incidents and ensuring high availability.
- Introduced a CI/CD pipeline for OrderStream, automating builds and reducing deployment time from hours to minutes.

General Dynamics | Pittsfield, MA - Software Engineer I

May 2015 - Dec 2017

- Independently orchestrated a C to C++ tech refresh for a legacy embedded system.
- Successfully pitched and migrated the team from a legacy version control system to Git, increasing team collaboration and productivity.
- Modernized workflows by introducing scrum ceremonies and daily standups, improving team communication and transparency.

EDUCATION

Massachusetts College of Liberal Arts | North Adams, MA - BS, Computer Science

September 2013 - May 2016
